

POSTMAN LOCAL

Alexis Leonardo Cazares Lobato

13/11/2025

A screenshot of the Postman application interface. The left sidebar shows "Leonardo Cazares Iobato's Worksp..." with sections for Collections, Environments, History, and Flows. The main workspace shows a collection named "My Collection" with two items: "Get data" (selected) and "Post data". The "Get data" item has a "GET" method, URL "https://api.thecatapi.com/v1/images/search", and a "Send" button. Below it are tabs for Docs, Params, Auth, Headers (6), Body, Scripts, Settings, and Cookies. The "Params" tab shows a table with columns Key, Value, Description, and Bulk Edit. The "Body" tab shows a response with status 200 OK, time 254 ms, size 1.13 KB, and a JSON preview. The preview table has columns id, url, width, and height, with one row: id af1, url https://cdn2.thecatapi.com/images/af1.gif, width 345, height 247. To the right, a "Code snippet" panel displays Python code using the requests library to make a GET request to the specified URL.
